Howard Wang's Semester 1 Testing Reports

Report 1: Cyrus Cowley
Your game needs to be a bit harder, I would make the bullets fire less often, and the ships move faster. Also your ship moves very quickly, and with no acceleration. I think it would be more interesting if you had some delay/acceleration in your movement to make it a bit harder.

My reply:
I agree that my game is way too easy, and that I should make my ship fire bullets less often and increase the fire rate. I will make my ship go slower also, but I might not include acceleration because that would make my game too hard and the ship would be very hard to control.

Report 2: My father
Nice fun game to play. Reminds me the first few window game. Great job!
It would be more fun with points or missiles and big boss.

My reply:
I will add a boss soon for my project. I will probably not add points because the game is based off lives, and not scoring.
